

Toolkit for Talanoa Dialogue

Questions for Talanoa Dialogues concerning Climate Change

The questions are broad to allow people to consider what is important to them.

- **Where are we?**
- **Where do we want to go?**
- **How do we get there?**

These thinking questions have been suggested by the United Nations:

Where are we?

- What have we said, planned and done so far in adapting to climate change; minimising loss and damage, improving resilience and reducing greenhouse gas emissions?
- What progress has been made including success stories, case studies and gaps?
- What has been the impact?

Where do we want to go?

- What is the vision of our future role in improving adaptation action, minimising loss and damage, building resilience and reducing greenhouse gas emissions?
- What new commitments and contributions can we make?
- What could be the positive impacts of realising these commitments and contributions to the sustainable development agenda?

How do we get there?

- In what ways do you think that -the UN Climate Change process help you?
- What solutions and lessons learnt can help countries in achieving their goals?
- What collaboration with other stakeholders is helping you, or can help you, achieve your commitments?
- What do you need from national governments, other non-Party stakeholders and the UN Climate Change process to take even further action?
- What will be the impact if these opportunities are implemented? How much further could they could go?

Concerning Islamic Relief

Where are we? Where do we want to go? How do we get there?

In what ways do you think that -Islamic Relief can help you to do what is needed?
